(54) ON-VEHICLE ELECTRIC APPLIANCE

(57)Abstract:

PROBLEM TO BE SOLVED: To solve the problem of a conventional on-vehicle electronic appliance that a display member and an operating member are arranged in one panel fixed in front of a case or tiltably arranged so that the display member and the operating member can not be inclined in a different angle and an area to be used is limited to a small area.

SOLUTION: A first panel 11 and a second panel 12 are projected in front of the case 1, and the second panel 12 has an inclined position by turning upward around a front part thereof. A display member 14 provided in the second panel 12 can be obliquely directed and the display members 13a and 13b provided in the first panel 11 can be provided upward. With this structure, the display member 14 is easily monitored, and the display members 13a and 13b are easily operated.
